Cluster Setup

Database Setup

Configure and test database connections. If using custom databases, create the databases first according to the **Installing and Configuring an External Database** section of the Installation Guide ↗ .

○ **Use Custom Databases**
◉ **Use Embedded Database**

When using the embedded database, passwords are automatically generated. Please copy them down.

Reports Manager

Currently assigned to run on **master.khaos.cluster**.

Database Host Name:	Database Type:	Database Name :	Username:	Password:
master.khaos.cluster:7432	PostgreSQL ▾	rman	rman	LJW3HXj4EC

✓ **Successful**

[Test Connection]
